

Michael Romashov

New York, NY | [+1 \(347\) 977-2274](tel:+13479772274) | mike@romashov.dev | github.com/MikeRoma

EDUCATION

Bachelor of Science, Computer Science
City College, City University of New York

Aug 2022 – May 2025
New York, NY

Summa Cum Laude, 3.932 GPA, 6x Dean's List Recipient

EXPERIENCE

Software Engineer – ENG Knowledge Discovery
Bloomberg L.P.

Sep 2025 – Present
New York, NY

Inner Source Contributor – ENG Knowledge Discovery
Bloomberg L.P.

May 2023 – Sep 2025
New York, NY

- Helped define the visual identity of a new documentation generation website. Participated in UX studies to ensure the new design was intuitive for users and well-received. Contributed new functionality for error reporting, page metadata, page watching, and enriched content such as code blocks and Mermaid diagrams.
- Developed graph visualization tool for exploring architecture diagrams of engineering groups and products with the goal of improving asset visibility for compliance with Digital Operational Resilience Act (DORA) regulations.
- Implemented hierarchical search functionality in the internal engineering search engine. Assisted other teams in integrating their products with the new feature through inner source contributions.

Python Code Reviewer – ENG Training and Documentation
Bloomberg L.P.

Jan 2023 – Sep 2025
New York, NY

- Reviewed Python projects completed by entry-level engineering trainees for correctness and adherence to best practices and language style conventions.
- Mentored training classes on Bloomberg's UI technologies with TypeScript. Conducted one-on-one tutoring sessions with trainees to review feedback and resolve questions on programming topics.
- Developed web-based tools to enhance visibility over training class performance for technical trainers and to provide a more continuous onboarding process for trainees.

Volunteer Web Developer

May 2020 – Nov 2024

Virtual Air Traffic Simulation Network (VATSIM)

Remote

- Served as webmaster for the Virtual Houston Air Route Traffic Control Center (ARTCC). Created a brand-new full-stack application to make information easily available to flight simulation hobbyists and to aid staff in managing training and events.
- Designed and implemented a new webhook system with Redis Queue to notify divisions and subdivisions of roster updates. Significantly reduced network load as subdivisions no longer needed to periodically poll the central service for changes.

ACADEMIC ACHIEVEMENTS

National Cyber Scholar with Honors

Nov 2022

- Among 415 highest-ranking students nationwide in the 2022 National Cyber Scholarship program.
- Participated in the 2022 Cyber Foundations Academy and passed the GIAC Foundational Cybersecurity Technologies (GFACT) certification exam.

SKILLS

Programming	Python, TypeScript, Rust, SQL, C/C++
Frameworks	React, Next.js, Tauri, Quart, Django
Tools	GitHub, Docker, PostgreSQL
Languages	English (native), Russian (native)
